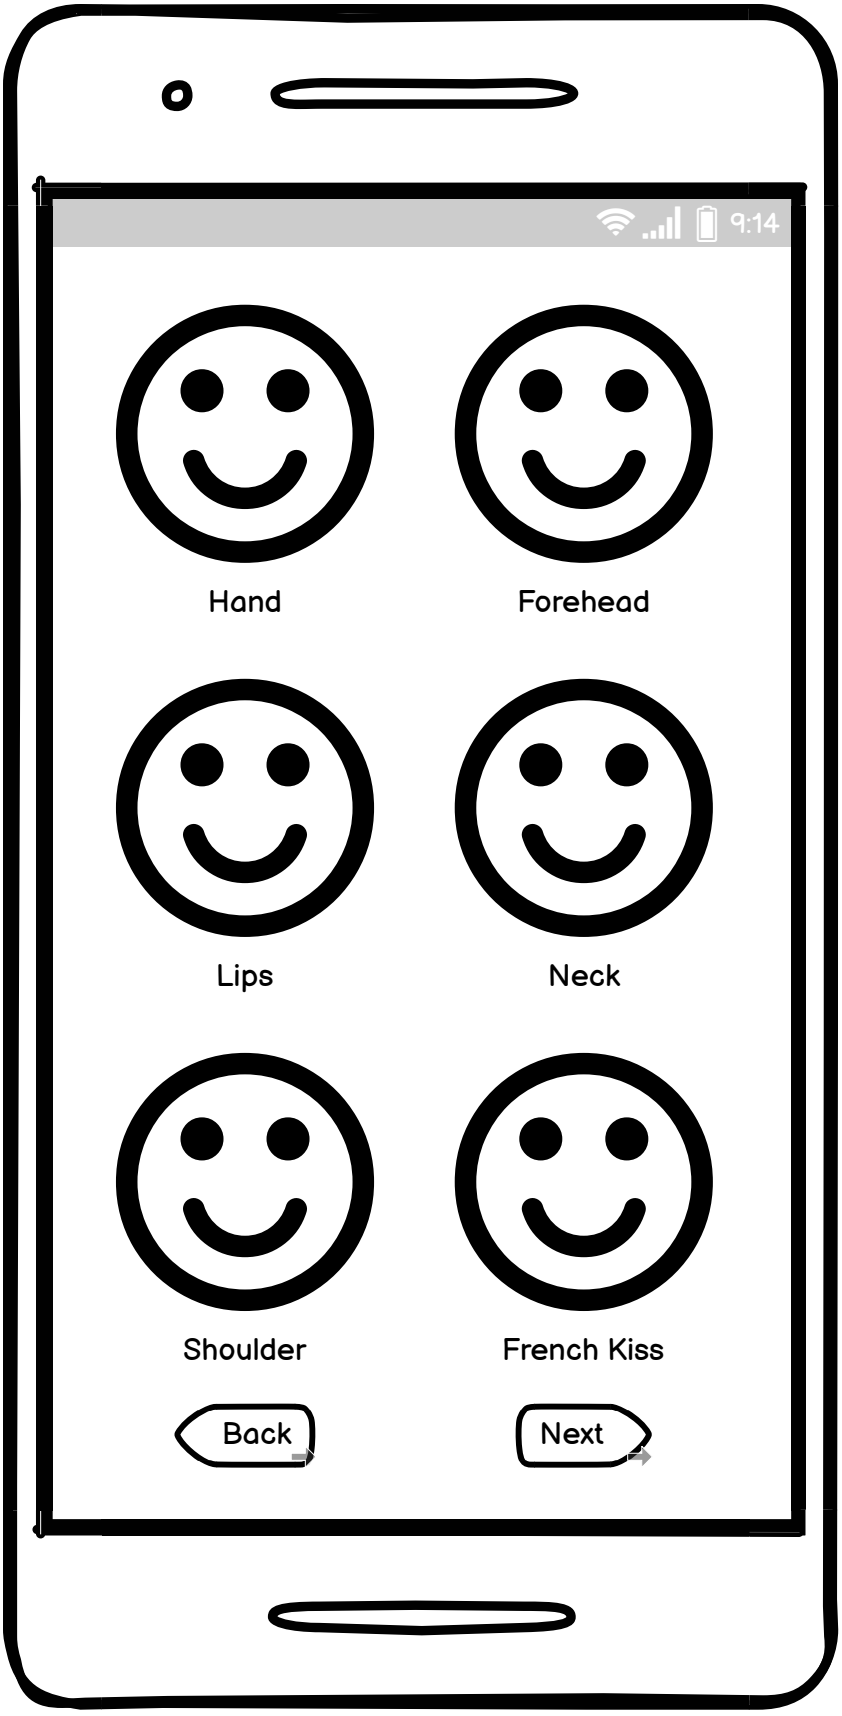
Type of Kiss >
Kiss >
Post My Kiss



Change Log

- Yes, these should act like Radio Buttons ...only one is allowed to be clicked at a time. Initial state: none are clicked. Once a Type of Kiss has been clicked, it remains the default for the current session.
- Restarting the app, resets to the buttons to none are clicked.

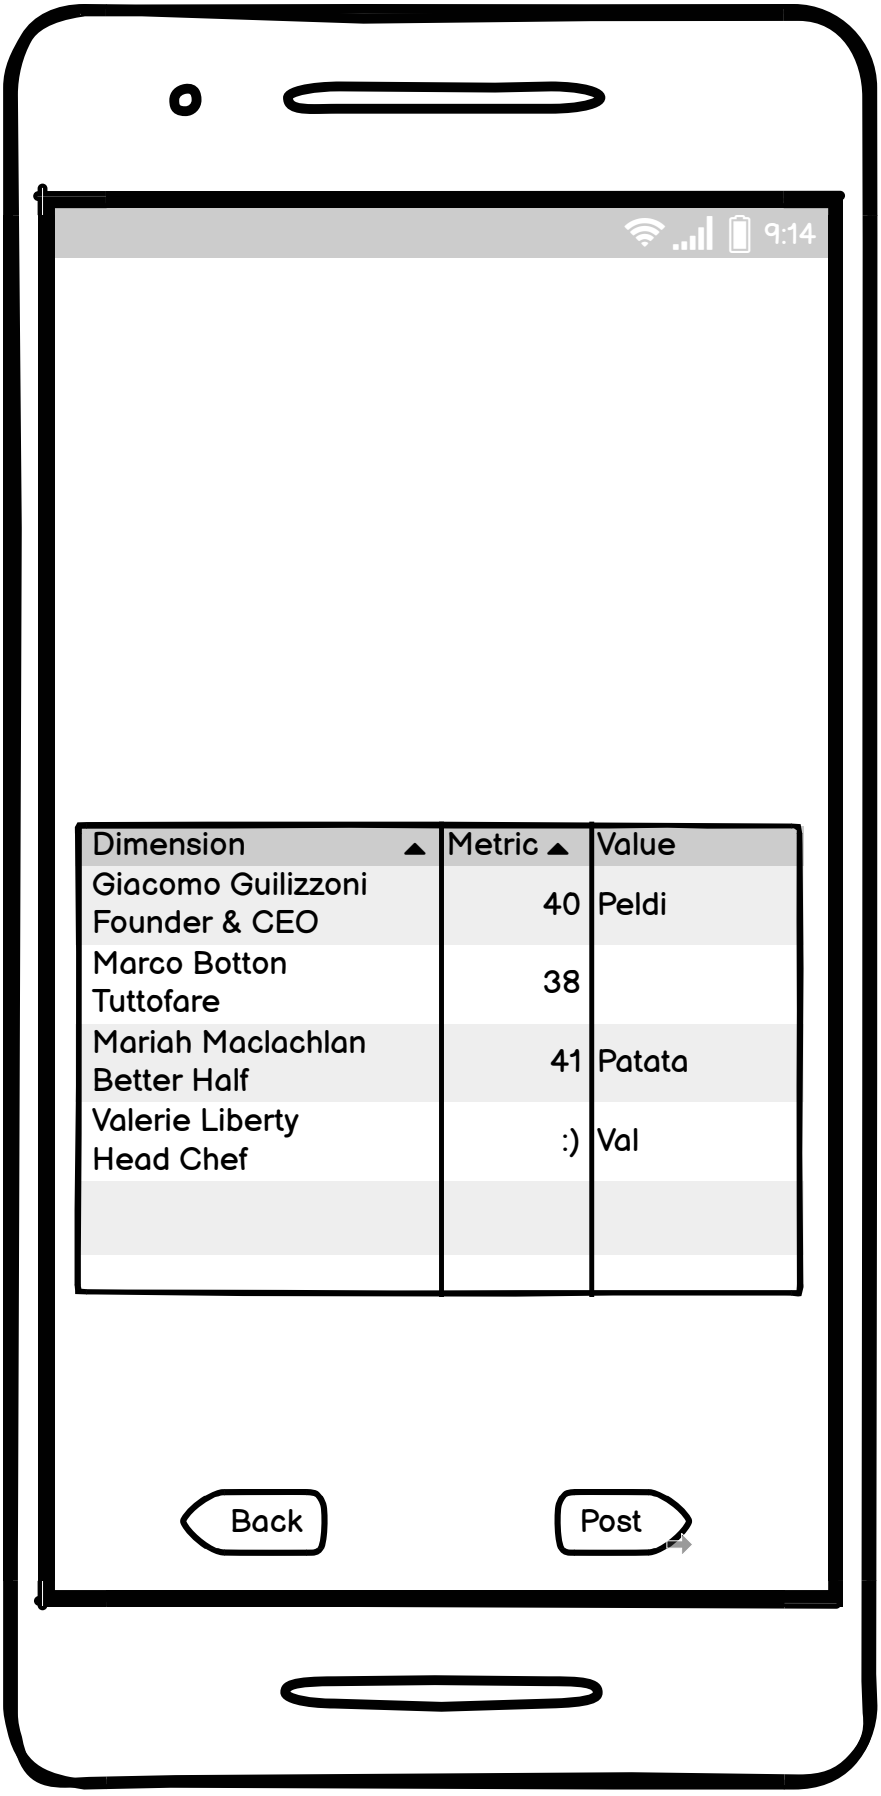
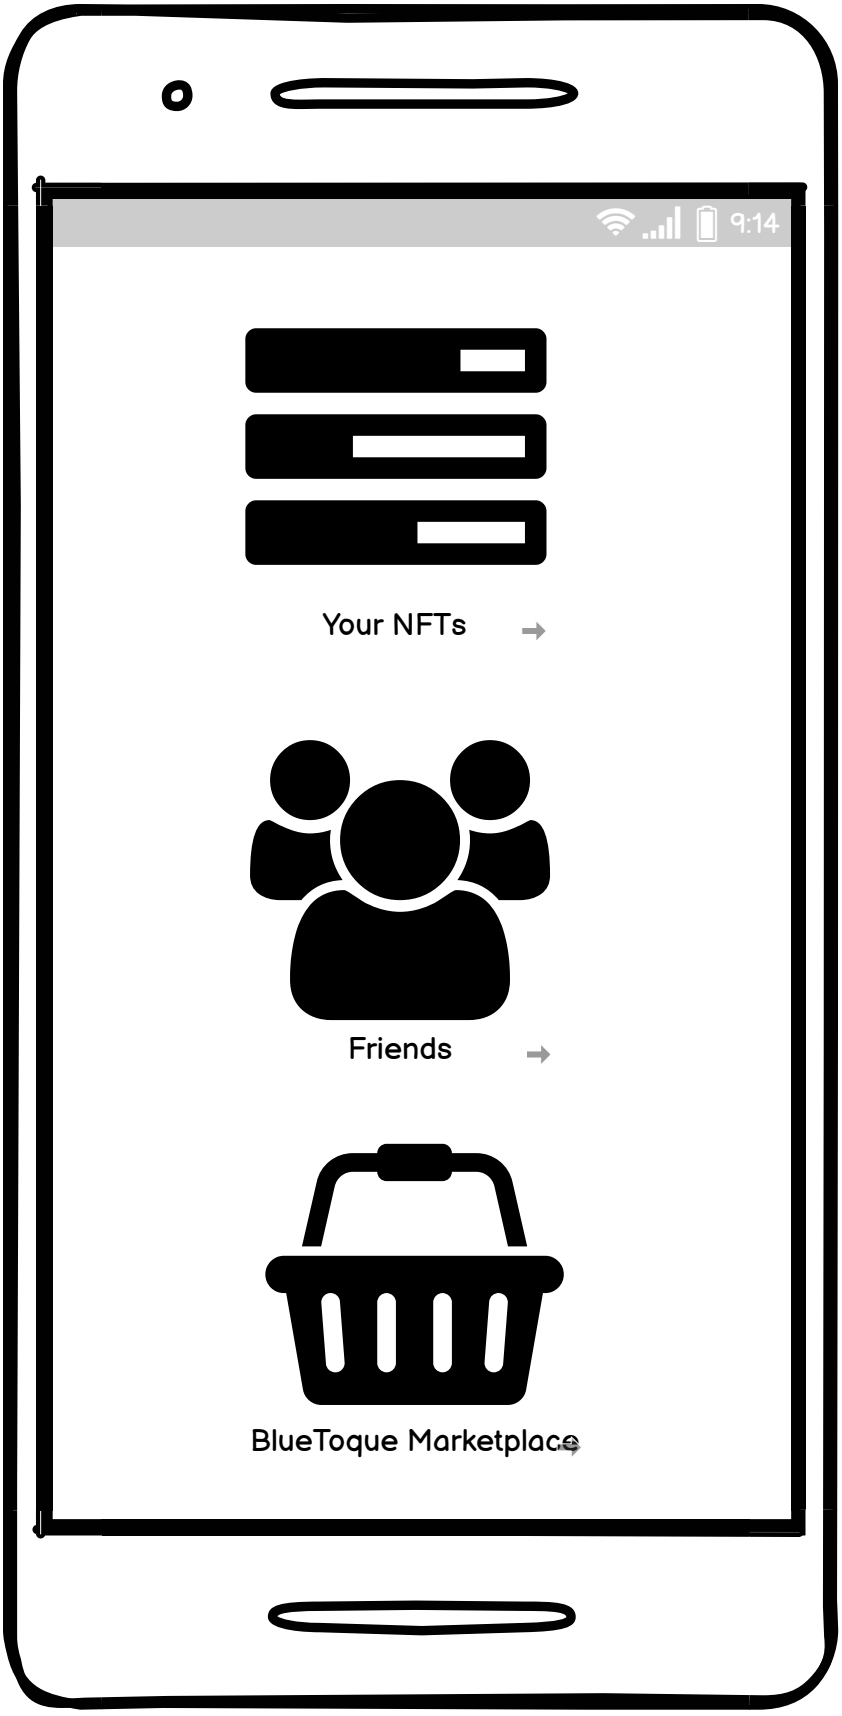
Change Log

- Changed Next to Post



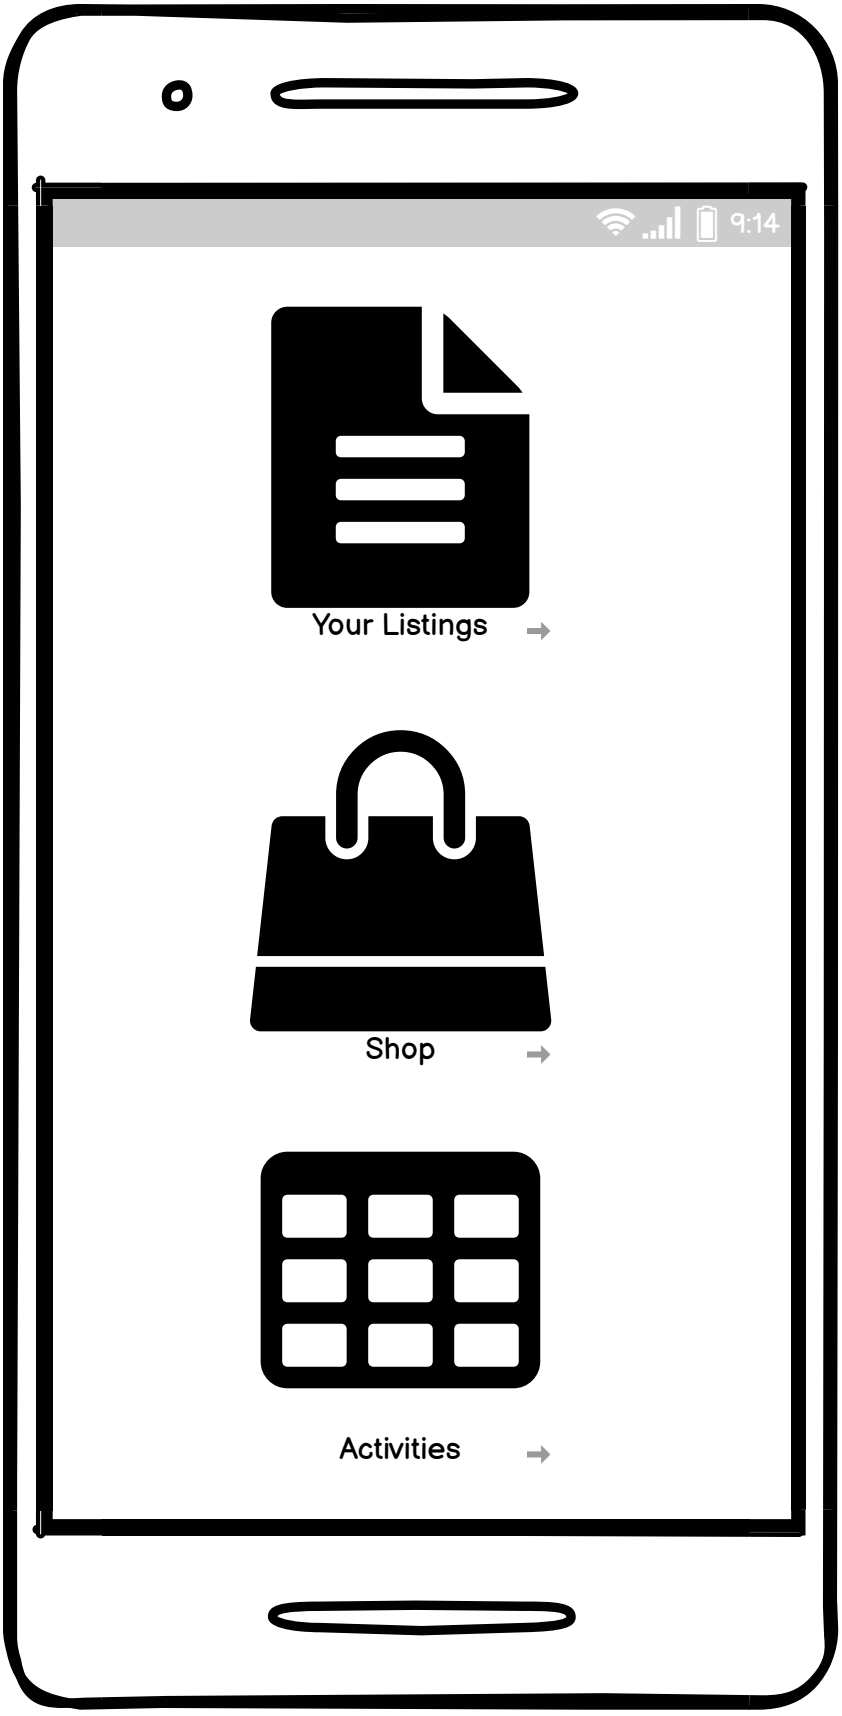
Post My Kiss - Confirmation Panel

- Request permission to Share PII (Personally Identifying Information)
- Maybe this should be a pop-up on frame 2.2b?
- Change "Next" to "Post"



Change Log

- Friends is not implemented in version 1. It transitions to frame 6.
- BlueToque Marketplace is not implemented in version 1. It transitions to frame 4.



Change Log

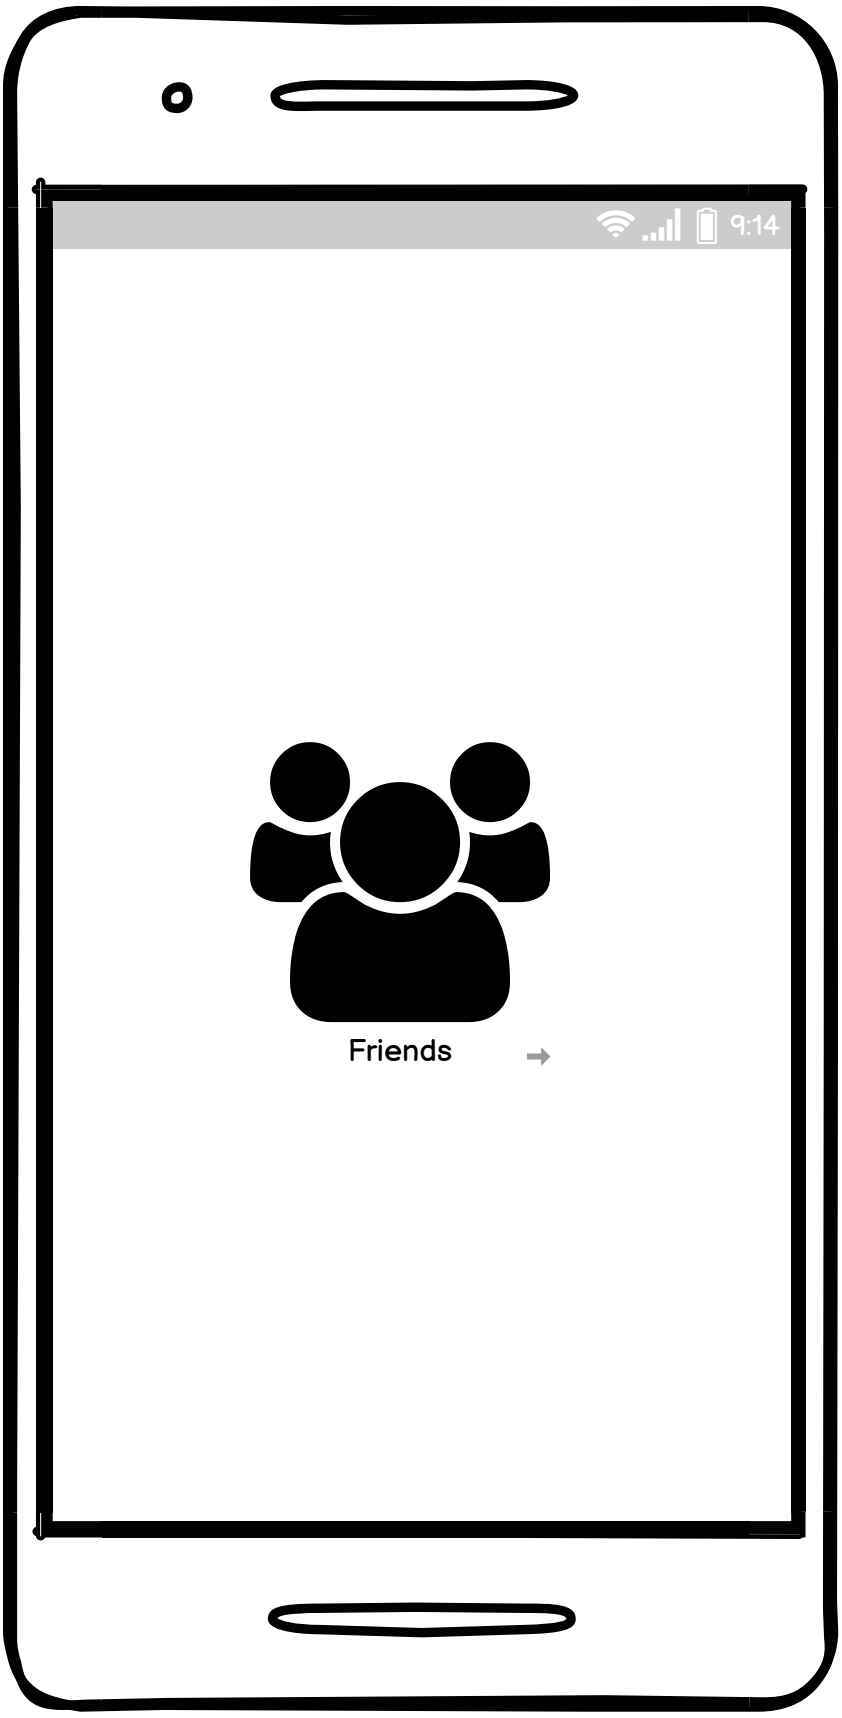
- None of these are implemented in version 1. They all transition to frame 9.
- Changed Activity to Activities

Change Log

- Replaced LinkedIn Feed with SMS Text Message
- Priorities for development:

1. SMS Text Message (will need a physical Android phone)
2. Facebook Messenger
3. Twitter Feed
4. Facebook Feed
5. Outlook Email
6. BlueToque Marketplace - not implemented in Version 1

Changed SMS Text Messaging to SMS Text



Change Log

- New frame - not implemented in version 1.
- It transitions to frame 9
